Position Title:

Risk Management Specialist (Event Management)

Organization:

Keck Medicine of USC

Location:

Los Angeles, CA

Job Description (*including education/experience requirements, benefits, duties, etc.*)

The Risk Management Specialist (Event Management) supports the Office of Integrated Risk Management by providing departmental expertise in initial event review and assignment of patient safety events; facilitating the incident reporting process to ensure patient safety events are addressed and documented; managing the source of information for patient safety events; using patient safety event data and assessment tools to conduct education and coordinate patient safety activities with appropriate individuals; coordinating with others in the Office of Integrated Risk Management Office in managing complex patient safety and event concerns; providing educational programs in both inpatient and outpatient settings; administrative support consisting of meeting preparation; and other duties as assigned. This role is critical to the Office's commitment to collaborative, data-driven risk management and risk mitigation services to the Keck Medicine system as a whole.
