

Employment Opportunity

Position Title:

Risk Management Analyst (Data & Education)

Organization:

Keck Medicine of USC

Location:

Los Angeles, CA

Job Description (including education/experience requirements, benefits, duties, etc.)

The Risk Management Analyst (Data and Education) supports the Office of Integrated Risk Management by providing departmental expertise in health care informatics, consisting of data base management, developing targeted and timely data reports and dashboards, data entry, data analysis, and regular document/report generation; providing educational programs and maintenance of the enterprise risk management education calendar; administrative support consisting of meeting preparation, auditing and regulatory quality control; and assisting with the coordination and facilitation of root cause analysis and intensive reviews. This role is critical to the Office's commitment to collaborative, data-driven risk management and risk mitigation services to the Keck Medicine system as a whole.

Minimum Education:

Bachelor Degree, Master Degree preferred

Minimum Experience/Knowledge:

- Five years of experience in risk management, quality, performance improvement, patient relations, safety or other related healthcare position/setting (Preferred);
- Knowledge of JCAHO, Title 22, and CMS regulations pertaining to healthcare (Preferred);
- Knowledge of principles, practices, processes, quality assessment, performance improvement functions, and legal concepts related to healthcare or related field (Preferred);
- LEAN or Six Sigma Certification (Preferred)
